Is there a plugin for this? I've checked If you can change the colour of their dick, but not sure how to change their appearance and/or size. A: There's a widget to change their appearance in the Character Poses tab of the Character Styling section. They're listed in the [Character Names] sheet of the Character sheet, in the icon set section. The Character Poses section has a subsection for face items called "Face: Poses". The default, or first option in the list, is "Default face pose". By default, HS2 characters have the default character pose as their face, but you can change them using the widget above. # This file is automatically generated by Android Tools. # Do not modify this file -- YOUR CHANGES WILL BE ERASED! # # This file must be checked in Version Control Systems. # To customize properties used by the Ant build system edit # "ant.properties", and override values to adapt the script to your # project structure. # To enable ProGuard to shrink and obfuscate your code, uncomment this (available properties: sdk.dir, user.home): #proguard.config=\${sdk.dir}/tools/proguard/proguard-android.txt:proguard-project.txt # Project target. target=android-25 Q: Java: Initializing an ArrayList of an object I have been reading up on how arrays are created, initialized, and accessed, and it seems like the object has a reference to the array. So if you have a code such as the following, what does it mean? public class ArrayTest { ArrayList dogs = new ArrayList(); public void test() { Dog dog1 = new Dog(); Dog dog2 = new Dog(); Dog dog3 = new Dog(); Dog dog4 = new Dog(); dogs.add(dog1); dogs.add(dog2); dogs.add(dog3); dogs. 82157476af
